PUBLISHED BY

THE WISTAR INSTITUTE OF ANATOMY AND BIOLOGY PHILADELPHIA, PA.

CONTENTS

No. 1 FEBRUARY 1953

Theodor von Brand, Eleanor Johnson Tobie, Benjamin Mehlman and Eugene C. Weinbach. Observations on the metabolism of normal and	
arsenic-resistant Trypanosoma gambiense. Eight figures	1
A. A. Andreasen and T. J. B. Stier. Anaerobic nutrition of Saccharomyces cervisiae. I. Ergosterol requirement for growth in a defined medium	23
ROBERT EDELBERG. The action of tannic acid on model systems formed of constituents of the erythrocyte membrane. One figure	37
G. GOMORI AND R. D. CHESSICK. Histochemical studies of the inhibition of esterases. Six figures	51
W. N. Pearson. The decarboxylation of amino acids by Photobacterium fischeri. Four figures	65
BERWIND P. KAUFMANN, JESSIE M. PENNOYER AND MARY E. ROWAN. Cyto- chemical studies of the action of trypsin. II. Analysis of the swelling of salivary-gland cells. Four figures	79
H. MARGUERITE WEBB AND FRANK A. Brown, Jr. Diurnal rhythm in the regulation of distal retinal pigment in Palaemonetes. Six figures	103
Frank A. Brown, Jr., H. Marguerite Webb and Muriel I. Sandeen. Differential production of two retinal pigment hormones in Palaemonetes by light flashes. Ten figures	123
P. A. LITTLE, J. J. OLESON AND J. M. SCHAFER. Effect of aureomycin on utilization of phytomonads by ciliates	145
Selma Kaplan, Eugene D. Rosenbloom and Vernon Bryson. Adaptive enzyme formation in radiation-sensitive and radiation-resistant Escherichia coli following exposure to ultra-violet. Three figures	153
RICHARD N. STEARNS. Respiration, rhodanese, and growth in Escherichia coli. Four figures	163

No. 2 APRIL 1953

John N. Haas. Effects of some enzymes injected into the slime mold Physarum polycephalum	171
EDITH HERMAN AND HELEN WENDLER DEANE. A comparison of the localization of alkaline glycerophosphatase, as demonstrated by the Gomori-Takamatsu method, in frozen and in paraffin sections. Sixteen figures	201
D. R. H. GOURLEY AND J. T. MATSCHINER. Rates of exchange of phosphate ions in human, rabbit and chicken blood. Two figures	225
EVELYN HOWARD. Some effects of NaCl concentration on the development of early chick blastoderms in culture. Six figures	237
TALBOT H. WATERMAN AND DOROTHY F. TRAVIS. Respiratory reflexes and the flabellum of limulus. Eight figures	261
F. H. McCutcheon. Atmospheric respiration and the complex cycles in mammalian breathing mechanisms	291
ABRAHAM M. SHANES. Effects of sheath removal on bullfrog nerve. One figure	305
L. Levenbook. The variation in phosphorus compounds during metamorphosis of the blow-fly, Calliphora erythrocephala Meig. Three figures	313
CHARLOTTE HAYWOOD. The cleavage times of fertilized eggs of the sea urchin, Arbacia punctulata, at high pressures of nitrogen, helium, and nitrous oxide	335
G. E. STAPLETON, DANIEL BILLEN AND ALEXANDER HOLLAENDER. Recovery of x-irradiated bacteria at suboptimal incubation temperatures. Four figures	345
No. 3 JUNE 1953	
ROBERTS RUGH, BARNET LEVY AND LOTTIE SAPADIN. Cellular changes accompanying acute and sub-acute x-irradiation death of the hamster. II. The endocrine. Forty-two figures	359
F. R. Hunter. An analysis of the photoelectric method for studying osmotic changes in chicken crythrocytes. Five figures	387
M. LAURANCE MORSE, ARTHUR W. BURKE, JR., AND WILLIAM T. BURNETT, JR. The adsorption of oxygen from buffer solutions by cells of Escherichia coli B/r. Two figures	407
ABRAHAM M. SHANES AND MORRIS D. BERMAN. Penetration of the intact frog nerve trunk by potassium, sodium, chloride and sucrose. Five figures	419

MARY ESTHER GAULDEN, MARJORIE NIX AND JACK MOSHMAN. Effects of oxygen concentration on x-ray-induced mitotic inhibition in living Chortophaga neuroblasts. Seven figures	451
CHARLES P. LYMAN AND ELIZABETH H. LEDUC, Changes in blood sugar and tissue glycogen in the hamster during arousal from hibernation. Six figures	47]
LISELOTTE MEZGER-FREED. Phosphoprotein phosphatase activity in normal, haploid and hybrid amphibian development. Six figures	493
Comments and Communications:	
JOHN V. SLATER. Influence of pH on the growth of Tetrahymena in synthetic medium. One figure	519
L. VAN DAM AND P. F. SCHOLANDER. Concentration of hemoglobin in the blood of deep sea fishes	522
SUPPLEMENT No. 1 TO VOLUME 41, MARCH, 19	53
Introduction — Alexander Hollaender	9
C. B. VAN NIEL. Introductory remarks on the comparative biochemistry of microorganisms	11
W. W. Umbreit. Respiratory cycles. Eight figures	39
G. DAVID NOVELLI. Studies concerning the structure of coenzyme A. Five figures	67
E. R. STADTMAN. The enzymatic synthesis of acyl-coenzyme A compounds. Two figures	89
F. LIPMANN, M. E. JONES, S. BLACK AND R. M. FLYNN. The mechanism of the ATP-CoA-acetate reaction	109
I. C. Gunsalus. The chemistry and function of the pyruvate oxidation factor (lipoic acid). Two figures	113
B. L. Horecker. The metabolism of pentose phosphate. Sixteen figures	137
W. A. Wood and R. F. Schwert. Alternate pathways of hexose oxidation in Pseudomonas fluorescens. Ten figures	165
J. O. LAMPEN. Pentose and desoxypentose metabolism in bacteria. Eight figures	183
RAIPH D DEMOSS Routes of ethanol formation in bacteria. Four figures	207
